(54) Title: METHOD FOR PROVIDING INFORMATION OF TELEPHONE NUMBER OWNER USING WIRE/WIRELESS COMMUNICATION TERMINAL AND SYSTEM FOR IMPLEMENTING THE SAME

(57) Abstract: This invention is about the method of providing call number owner's information and the system to implement it. Using this invention, service provider's system receives, from many users, call number owner's information that has at least call number and call number owner's name or firm name, stores them, and also receives call number, for which call number owner's information is provided, from call number management program run on the wire/wireless communication terminal. And then, it transmits the call number owner's information corresponding with the call number to the call number management program. Next, the programs pairs the call number and the owner's information, generates call number list and stores in the memory of wire/wireless communication terminal. By using this invention, even if user knows only call numbers, user can automatically generate call number list and manage easily.
